# Web Ecology

An Open Access  
Peer-Reviewed Journal

**JOURNAL RELAUNCH**

European Ecological Federation

## Aims & Scope

**Web Ecology (WE)** is an open access journal issued by the European Ecological Federation representing Ecological Societies within Europe and associated members.

**Web Ecology** publishes papers from all fields of ecology within a broad context. It is a forum to communicate results of experimental, theoretical as well as descriptive studies of general interest to an international audience. Original contributions as well as short communications and reviews on ecological topics regarding all kind of organisms and ecosystems are welcome. Papers must be original and not previously published in another journal. Nevertheless, a re-analysis or a re-interpretation of published data is possible. We also encourage to publish research already reported within master or PhD theses or research published in the so-called "grey literature". However, we do not reprint such theses or reports. They always require considerable shortening and editing before to meet the standards of international publications in ecology.

### Subject Areas

- Behavioural Ecology
- Biodegradation
- Biodiversity
- Community Ecology
- Conservation Ecology
- Ecological Genetics
- Ecological Physiology
- Ecosystem Ecology
- Environmental Biology
- Global Change Ecology
- Landscape Ecology
- Macroeecology
- Plant-Animal Interaction
- Population Ecology
- Theoretical Ecology
- Urban Ecology
- Water Management

## Publication Policy

- Free online access to all articles following the Open Access publication model.
- Rigorous peer-review of all articles prior to publication.
- Moderate service charges depending on the submitted file category.
- No extra charges for colour illustrations and supplementary material, e.g. movies, data sheets.
- Authors keep copyright. Papers are published under the Creative Commons Attribution License.
- Long term archiving & e-archiving and indexing in scientific databases & search engines worldwide.
- Efficient new way of publishing special issues.
- Moderate charges for printed issues.

### Journal Facts

- **Introductory offer – waived service charges!**
- e-archived with Portico
